## PROFILE SUMMARY

**Full Stack Developer** with 1 year of hands-on experience designing, developing, and deploying scalable web applications using modern Java frameworks and frontend technologies. Proficient in end-to-end development, from crafting responsive UIs to optimizing backend performance and database integration. Adept at leveraging **Java, Node.js, Nest.js, React/Angular, Type-Script and AWS** to deliver high-quality solutions.

## EXPERIENCE

### My Exim Business

2024 - 2025

*Position– Full Stack Developer*

*DLF-It Tech Chennai*

- Developed and maintained 5+ dynamic web applications, reducing page load time by 40% and improving UI/UX efficiency by 25%
- Integrated JWT authentication, enhancing API security by 30%.
- Deployed applications using Docker and AWS for scalable cloud hosting.

## PROJECTS

### Food Ordering Website | Html, Css, Java-Script, React-Js

june 2024

- Developed an RPA solution to extract all files from a specified folder in the local machine and log the file extensions into an Excel sheet using a For Each loop.
- This automation made inventory tracking easier by categorizing files based on their extensions.

### My Exim Business App. | Html, Sass, React-Js, Type-Script, Node, Nest-Js

Jan 2025

- Developed a comprehensive web application for managing export and import operations efficiently.
- Implemented features like shipment tracking, port selection, and freight management using React, Ant Design, and other modern web technologies.
- Open Browser: Launched the web browser and navigated to the portal and Real Time Project.

### E-commerce -Website | React, JavaScript, Database – PostGres Sql IDE - VS Code 2024

- Enhanced a **fully responsive** E-commerce website with **real-time availability checks**. Optimized database queries, reducing Add and Remove Products confirmation time by 50%.
- Integrated secure payment processing via Stripe API
